ABSTRACTED-PUB-NO: RU 2029817C

BASIC-ABSTRACT:

The machine has a chassis (2) with blower (1), a cylindrical working vortex chamber (4), fitted inside the receiver (5), a drum body (8), rubbish collector (11). The pressure pipe (6) is split and is fitted in the drum body (8), divided into two sections by wall (12). The chamber (4), receiver (5) and the rubbish collector (11) are situated in the body (8). The drum body can turn about its axis by means of hydraulic cylinder (7).

USE/ADVANTAGE - For road sweeping. The manoeuvrability is increased. Bul.
